

Handout 2: List of required Apps

List of Required Android Apps

Purpose	Name of App	
geocaching	Columbus	suitable open source app for geocaching
monitoring GPS function	GPS Status	
file manager	Astro	universal file manager
	ES File Explorer	access to server via FTP
	OI File Manager	necessary for searching through folders with Columbus
	FTPServer	on some Samsung devices there is no access via USB. In the LAN, FTPServer offers an alternative method if necessary
browser	Firefox	as up-to-date as possible
audio recording	Virtual Recorder	Optional
mp3 encoder	FreeMP3Droid	Optional
Mp3 player	StreamFurious	may be required additionally on older smartphones
reading QR codes	QR Droid	optional

Please keep in mind that navigation technology and mp3 encoding draw heavily on your power source. Bring along a freshly recharged device. You should have your recharger with you, and a USB cable for transferring data. If you have one, also bring along a cable for transferring audio onto to a computer (may be analogue). Of course, Apple devices can also be used. Here however, transferring audio is a bit more difficult, and the selection of geocaching apps is more limited.
